

Claims:

1. (amended) A cash management data processing system for multi-location standardized trading Nodes, allowing financial clearing within each Node, and between any two Nodes, linked to banking payment systems, comprising:
 - a) Fiduciary and electronic Escrow accounts at each Node;
 - b) an electronic processor for fund movement between Fiduciary and Escrow accounts bidirectionally at each Node;
 - c) an electronic intelligent hub for matching orders among different Nodes
 - d) an electronic processor for fund movement from Fiduciary account of one Node to another for financial clearing;
 - e) a price matching engine in selected base currency;
 - f) an electronic processing system for providing daily cash settlement for financial reporting;
 - g) an electronic processing system for reporting daily account statement;
 - h) an electronic processing system for daily physical delivery settlement.
2. (amended) System of claim 1, wherein the required funds for customer's pending match will be blocked from said Fiduciary account until a match is made or the order is canceled.
3. (amended) System of claim 1 wherein said Fiduciary account holds local currency and at least one foreign currency as base currency in a Node.
4. (amended) System of claim 2, wherein said blocked funds from Fiduciary account are moved to Escrow account in base currency after a match is made.
5. (amended) System of claim 4, wherein a daily price adjustment to the blocked funds in said Escrow account is made reflecting marked-to-market cash value of transaction.
6. (amended) System of claim 5, wherein said marked-to-market pricing triggers movement of funds between Fiduciary and Escrow account to make the necessary adjustment.
7. (amended) System of claim 6, wherein the net amount retained in Escrow account resulting from said movement of funds between Fiduciary and Escrow account constitute daily cash settlement

8. (amended) System of claim 1 wherein, a designated bonded warehouses are utilized for said physical delivery settlement.
9. (amended) System of claim 8, wherein, physical delivery settlement is made by , exchanging said bonded warehouse digital receipt of goods with electronic fund transfer from Fiduciary account
10. (canceled)
11. (amended)) System of claim1, wherein the said financial clearing between two Nodes is accomplished by transferring fund from Fiduciary account of one Node to Fiduciary account of another Node in base currency .
12. (amended) System of claim 11, wherein said transferred fund is moved to Escrow account of the Node that the match is made.
13. (amended) System of claim 12, wherein said transferred fund to Escrow account constitutes the additional fund required to complete settlement process in the Node that match was made.
14. (canceled) .
- 15.(amended)System of claim 1 wherein the time period for daily settlement reflects the time T representing _execution of the trade to T+1 representing settlement date plus time zone difference which includes International Date Line.
16. (amended) System of claim 1 wherein said banking payment system includes the Automatic Clearing House format and Rules utilization whenever Fiduciary account in a Node communicates with Federal Reserve Automatic Clearing House directly, or via the National Clearinghouses in North America.
17. (amended) A system of claim 1 wherein SWIFT protocols MT 103 and MT 940 are utilized for payments system format outside North America to communicate with Fiduciary accounts of Nodes executing electronic fund transfer between any two Nodes in different locations for financial clearing and settlement..
18. (amended) A procedure wherein the interbank currency exchange rates at noon time, Eastern Standard Time, are captured for daily currency translation of funds for the purpose of moving between Fiduciary account and Escrow account at the end of each trading day for settlement .

19..(new) System of claim 2 wherein blocked fund is a predetermined and periodically updated percentage amount of total monetary value of transaction for the duration of the agreement.

20. (new) System of claim 4, wherein the required blocked fund in said Escrow account is maintained in base currency, marked –to-market and adjusted daily for the duration of agreement.

Worksheet for above claims

1. (amended) ~~A methodology for standardizing a web based clearing system for a trading platform, defined as a Node and linked to a local commercial banks, further comprising:~~

~~Means of incorporating payments system into the Node for financial transactions; means of allowing the Node to clear financial transaction; means of allowing the Node to manage cash for settlement; means of allowing the Node to make payments against physical delivery.~~

A cash management data processing system for multi-location standardized trading Nodes, allowing financial clearing within each Node, and between any two Nodes, linked to banking payment systems, comprising:

- i) Fiduciary and electronic Escrow accounts at each Node;
- j) an electronic processor for fund movement between Fiduciary and Escrow accounts bi-directionally at each Node;
- k) an electronic intelligent hub for matching orders among different Nodes
- l) an electronic processor for fund movement from Fiduciary account of one Node to another for financial clearing;
- m) a price matching engine in selected base currency;
- n) a system for providing daily cash settlement for financial reporting;
- o) a means for reporting daily account statement;
- p) a means for daily physical delivery settlement.

2. (amended) System of claim 1, wherein ~~said payments system includes maintenance of Fiduciary account, further blocking funds allocated for customer pending transaction from Fiduciary account. the required funds for customer's pending match will be blocked from said Fiduciary account until a match is made or the order is canceled.~~

3. (amended) System of claim 2, claim 1 wherein the Fiduciary account is maintained as customer specific segregated account in fixed currency as well as variable currency and translating variable currency to fixed currency as needed in matching process for

clearing. said Fiduciary account holds local currency and at least one foreign currency as base currency in a Node.

4. (amended) System of claim 3, wherein blocked fund in said segregated Fiduciary account is moved to an Escrow account in fixed currency for order matching, further unblocking fund if the order is not matched as requested or canceled. claim 2, wherein said blocked funds from Fiduciary account are moved to Escrow account in base currency after a match is made.

5. (amended) System of claim 4, wherein a daily price adjustment to the blocked funds in said Escrow account is made after daily settlement reflecting marked-to-market cash value of transaction.

6. (amended) System of claim 5, wherein said adjustment will result in movement of funds between said Escrow and Fiduciary accounts, marked-to-market pricing triggers movement of funds between Fiduciary and Escrow account to make the necessary adjustment.

7. (amended) System of claim 1 claim 6, wherein the net amount retained in Escrow account resulting from said movement of funds between Fiduciary and Escrow account constitute daily cash settlement is made by adjusting customer said Fiduciary account in a Node.

8. (amended) System of claim 1 wherein, [[a]]designated bonded warehouses are utilized for said physical delivery settlement.

9. (amended) System of claim 8, wherein, physical delivery settlement is made by , exchanging electronic said bonded warehouse digital receipt of goods with electronic cash fund transfer from through Node's Fiduciary account

10. (canceled)

11. (amended)) System of claim 10 claim1, wherein [[the]]said procedure for financial clearing between two Nodes transfers is accomplished by transferring fund from Fiduciary account of one Node to Fiduciary account of another Node in fixed currency base currency for purpose of clearing a pending match .

12. (amended) System of claim 11, wherein said electronically transferred fund is recorded to the customer segregated accounts a fixed currency as order is matched in another Node is moved to Escrow account of the Node that the match is made.

13. (amended) System of ~~claim 11~~ claim 12, wherein said ~~fund movement internal transfer from Fiduciary to Escrow account in fixed currency if additional fund is to be deposited in the Fiduciary account of one Node from another Node~~ said transferred fund to Escrow account constitutes the additional fund required to complete settlement process in the Node that match was made.

14. (canceled) .

15. (amended) System of ~~claim 14~~, claim 1 wherein the ~~time period for daily settlement time period extends reflects the time governed by payments system, from the time T representing day 1 execution of the trade to T+1 representing day 2 settlement date plus time zone difference which includes International Date Line, depending on Geographical location of Nodes with respect to each other.~~

16. (amended) A procedure wherein the National Automatic Clearing House Association format and Rules are utilized as payment system format wherever the national clearinghouses communicate with Federal Reserve Automatic Clearing House through local bank. System of claim 1 wherein said banking payment system includes the Automatic Clearing House format and Rules utilization whenever Fiduciary account in a Node communicates with Federal Reserve Automatic Clearing House directly, or via the National Clearinghouses in North America.

17. (amended) A procedure system of claim 1 wherein SWIFT protocols MT 103 and MT 940 are utilized as ~~general~~ for payments system format outside North America to communicate with Fiduciary accounts of Nodes using any executing electronic fund transfer between any two Nodes in different locations for financial clearing and settlement..

18. (amended) A procedure System of claim 14, wherein the ~~real time interbank currency exchange rates at noon time, Eastern Standard Time, are captured for daily currency translation of funds conversion to the corresponding local currency is computed and credited to or for the purpose of moving between debited from respective Fiduciary account and Escrow account at the end of each trading day for settlement adjustment~~
